

OSHA Hazard Communication (29CFR 1910.1200)

July 2023

Dear Valued Customer:

Metal products are not typically considered hazardous in their solid distributed form by OSHA and Federal Standards. The stainless-steel tubing products sold by Accu-Tube, LLC do not present an inhalation, ingestion, or contact hazard in the form sold. However, subsequent operations to the material such as burning, brazing, welding, sanding, or grinding may result in dust or fumes that can cause irritations or other health hazards. It is the responsibility of the user to ensure proper safeguards are provided for employees when modifying this material such as: protective clothing, eye protection, gloves, respiratory protection, proper ventilation and any welding requirements.

Sincerely,

A handwritten signature in blue ink that reads "Mary Burgos". The signature is written in a cursive style with a vertical line extending downwards from the end of the name.

Mary Burgos
Quality Manager
