VITAL STATISTICS

Year Founded: 1973
Number of Employees: 60+
Number of Facilities: 1

WHO WE ARE

Specializing in welded and drawn 17-7 precision stainless steel tubing, we manufacture to spec – providing you with the lengths or special custom-fabricated forms for your medical device project. Our manufacturing facility is equipped to manufacture centerless ground tubing to $\pm .00025$ " outside diameters.

Additionally, we have extensive knowledge in processing many types of high-quality stainless steel alloys, including 304, 304L, 316L, and 321. Our expertise and focus on metals allows us to help our customers get the right material for their medical device project, making us a premier supplier option for many of your next-generation projects.

MAJOR MARKETS

Some of our medical successes include:

- Arthroscopy
- Biopsy Tubes
- Cannulas
- Closed-end Tubes with Apertures
- Diagnostics
- Endoscope Components
- General Surgical Instrumenting
- Irrigation Tubes
- Laparoscopic Tubes
- Minimally Invasive Surgical Instrumentation
