

Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) Statement of Compliance

July 2023

Dear Valued Customer:

Mercury Tube is a manufacturer of tubing products which contain stainless steel alloys as the base material and does not knowingly add or expose these materials to any substances from the Candidate List for Substances of Very High Concern (SVHC) of the European Community Regulation concerning the Registration, Evaluation, Authorization, and Restriction of Chemical substances (REACH).

REACH applies to chemical substance or products (called "articles" in the Regulation) that release chemicals into the environment during their normal use. REACH does not apply to solid raw materials such stainless steel in the form of tubing as end products.

Therefore, Mercury Tube has determined that to the best of its knowledge, its stainless-steel tubing products do not contain any of the Substances of Very High Concern (SVHCs) list of June 2022 (224 SVHCs) and by default are exempt from the REACH requirements consequently would be in compliance with REACH regulations.

Sincerely,

Mary Burgos
Quality Manager
