

Precision Stainless Steel Tubing

Accu-Tube is a world-leader in providing 17-7 and 304 stainless steel tubing and components to meet your project needs.

A SINGLE RESOURCE

Accu-Tube has over 45 years of experience providing worldwide, industry-leading companies with welded and drawn precision stainless steel tubing. Our tubing is manufactured in random lengths, cut lengths, or special custom-fabricated forms. Our manufacturing facility is equipped to manufacture centerless ground tubing to $\pm .00025$ " outside diameters.

Accu-Tube has extensive knowledge in processing a select group of high-quality stainless steel alloys, such as 17-7, 304, 304L, 316L, and 321, making us a premier supplier option for many of your next-generation projects.

PRECISION STAINLESS STEEL TUBING

Specific engineering requirements can be customized into the manufacturing processes to meet industry requirements for formability, strength, and exceptional finishes on both the outside and inside diameter.

Our trusted tubing can be found in many medical, aerospace, and commercial critical applications.

We can supply you with the products you need quickly and efficiently. Our fabrication processes include welding, drawing, straightening, cutting, deburring, cleaning, bending, coiling, end forming, beading, flaring, swaging, cleaning, and passivation, to name but a few.

MEDICAL EXPERIENCE

- Arthroscopy
- Biopsy Tubes
- Cannulas
- Closed-end Tubes with Apertures
- Diagnostics
- Endoscope Components
- General Surgical Instrumenting
- Irrigation Tubes
- Laparoscopic Tubes
- Minimally Invasive Surgical Instrumentation

AEROSPACE EXPERIENCE

- Cable Guides
- Heat Exchangers
- Injector Nozzles
- Pitot Tubes
- Thermocouples

COMMERCIAL EXPERIENCE

- Gas Chromatography
- Heater Coils
- Heat Exchange
- Sensor Tubes
- Temperature Probes

AVAILABLE MATERIALS

- 304
- 304L
- 316
- 316L
- 321
- 17-7 PH
- Nickel 200
- Nickel 201
- Inconel 600

Our tubing sizes range from .018" to .375" outside diameter with wall thicknesses between .003" and .038".
